Art Unit: 2652

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12 and 18-19, drawn to an "apparatus", classified in class 360, subclass 265.8.
- II. Claims 13-17 and 20-21, drawn to a "head actuator", classified in class 360, subclass 265.9.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of groups II and I are related as combination and subcombination, respectively. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require that "a center of mass of a portion including all of said magnetic head slider, said load beam, said head arm and said dummy weight coincides with a center of swing movement of said head arm in a radial direction of a recording medium and with a center of swing movement of said head arm in a direction perpendicular to a recording surface of said recording medium", for instance. The subcombination has separate utility such as usable in a combination not including a "pivot pin", for instance.

Art Unit: 2652

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Joseph A. Scafetta, Jr. on 13 March 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Craig A. Renner whose telephone number is (571) 272-7580. The examiner can normally be reached on Tuesday-Friday 9:00 AM - 7:30 PM.

Art Unit: 2652
